github: bit.ly/github-NOORDEEN4908

PROFILE :

I'm Noor Deen, a passionate and self-motivated undergraduate who loves full-stack web development. I have spent the past few years learning and building web applications. I completed my Higher National Diploma (HND) in Software Engineering at ICBT and am now doing my Bachelor's Degree in the same field. I enjoy facing new challenges and always try to learn new things to improve my skills in technology.

CAREER OBJECTIVE :

I am a motivated and hardworking full-stack developer with practical experience in Java, React, Node.js, Firebase and WordPress. I'm looking for a challenging job where I can use my problem-solving skills, work well with others, and build useful, safe, and user-friendly web applications. I'm always eager to learn new things and want to be a valuable part of a modern software development team.

Work Experience

Web Developer Intern

Federation for Environment, Climate and Technology (FECT) – Akurana, Sri Lanka

July 01, 2024 – January 20, 2025

- Contributed to the development and maintenance of the EEA Website. (<https://eea.awwa.lk/>)
- Assisted in the Flood Alert System project, supporting both frontend and backend tasks.
- Provided server-side support, including server setup and handling technical service requests.
- Assisted with instrumentation tasks such as equipment installation, calibration, and troubleshooting.

Front-end: React.js, TailwindCSS, CSS, JavaScript, HTML, WordPress

Back-end: Node.js, Express.js, PHP

Databases: MongoDB, Mongoose, PostgreSQL, MySQL

Programming Languages: JavaScript, Java, C#, C++, PHP, HTML, CSS

Tools: Git, GitHub, Firebase, ThunderClient, VS Code, Eclipse

Languages: English, Sinhala, Tamil

PROJECT EXPERIENCE:

Commercial Website for Ordinary Fitness

Built a modern website for a fitness brand using React and Node.js. Worked on design, user experience, and team collaboration.

Technologies: React, Node.js, MongoDB, Express.js

Inventory Management System for ABC

Created a system to manage inventory using C# and ASP.NET. Learned how big systems are designed and work in companies.

Shopping E-Commerce Website

Made a full shopping website with login, product pages, and cart. Designed to be secure and easy to grow.

Web App for Ecological Farming

Developed a backend platform for the Department of Agriculture to register and help farmers online.

Technologies: JavaScript, HTML, CSS, PHP

Campus Landing Page (WordPress)

Designed a user-friendly landing page for a college using WordPress with a clean and modern layout.

Clone Netflix Web App

Built a Netflix-like website using React and Firebase. Included secure login, real-time updates, and clean layout.

Technologies: React, Firebase, JavaScript, HTML, CSS

Restaurant Web Page (PHP)

Created a restaurant website with menu, reservations, and customer reviews. Used PHP and MySQL for backend.

Technologies: PHP, MySQL, HTML, CSS, JavaScript
